

# GR-6000 booth

Grinding Booth

Front doors with  
viewing windows

Attach to individual  
dust collectors  
(floor or top mounted),  
or central dust collector

Custom Is Our Standard

www.avanienvironmental.com

The GR-6000 is our Premier Grinding Booth. The 6000 series comes standard with 1 1/2" x 4" (rectangular tubing) skeleton with 12 gauge dual panels as the shell. Two gas or compressed air lines and dual 110V outlets are built into the back draft panel terminated on top for easy connections.

The GR series can be installed back-to-back, side-to-side, or both. The booths can be ducted to a central fume collector and/or fan. Avani offers the GR-6000 as a dual system interior with the fume collector mounted on top. This eliminates ducting and you only need to run the booths being used.
