

# MIST pump

The Avani Mist Pump features a 10 gallon tank capacity and a 1/6 HP (at 115V) motor. Made of 16 gauge steel and has a easy to clean screen filter bowl.

Screen Filter Bowl

Avani's Mist Pump is a self contained unit that is used in conjunction with mist collectors to accept, filter and transport fluids after collection. It can be installed as an attachment to the mist collector or as a stand alone unit. Fluids can be pumped back to the machinery for re-use or pumped to another source for collection and/or disposal. It features a 10 gallon storage tank, a 115 volt self priming pump and an adjustable float switch that activates the pump for the transfer of fluids.

Features:

- Constructed of 16-gauge steel
- Screen filter bowl
- One baffle in the tank
- Discharge through integral flange
- Vertical float switch - adjustable
